Summary

A Change Management and Project Management Consultant with more than 15 years of experience in the areas of project management, team leadership, coaching & mentoring who has successfully conducted numerous, complex and wide-ranging initiatives in a variety of business sectors with extensive advisory roles with Executives and Senior Management. My training experience led me to start my own educational firm for project management back in 2013. Before that, I had created an entire course for MBA since I was in my Undergrad at McGill University. Therefore, I created all the training material for PMP® with my business partner and were teaching over teleconferencing software such as Skype and Zoom. I am very adaptable to different industries, given my consulting background. I had my academic experience in public infrastructure such as Vancouver's TransLink systems, completing my Program Management Certification using TransLink as my final project deliverable. I am ready to make an impact with my knowledge and skill. I appreciate you taking your time to review my credentials.

Currently I'm completing an MSc. In Healthcare Informatics, after completing the Artificial Intelligence Leadership Certification Program at MIT Sloan School of Management

Specialties: Project Management, Program Management, Healthcare Strategy, innovation visionary, Gamification, Humanitarian Initiatives

Accenture

Consulting in PMO, SAP

2007 - 2013 (6 years)

- Managed a \$17 million Canada-wide project as the Assistant Project Manager; created and monitored Project Plans, Resource & Budget Allocations, Total Cost of Ownership, and Third-Party Contractor management for 200+ electronic retail chain stores
- Increased Quality Performance Index (QPI) by 12%, which resulted in one of the highest QPI across all of the client's projects
- Implemented a new centralized document storage and tracking suite and conducted training sessions for a total of 70-80 client executive users for the new SAP Solutions Manager implementation, resulting in 10% efficiency improvement among the client project teams

Project Management Specific Experiences:

- o Experienced in working with diverse Project Management IT systems across different companies and industries
- o SAP Solutions Manager (Off-the-shelf with added customization) # Initiated and implemented SAP's Solutions Manager suite for the entire TELUS corporation (both on-shore and off-shore) which allowed collaboration of project members as well as organizational employees to work more efficiently by eliminating the geographical boundaries
- o Mercury Dashboard PM Solution # A new PM tool I have learned with some very powerful functions for project comparisons.
- o Wholly Customized PM Templates # Developed customized program/project-specific PM tools using Excel, such as resource and budget tracking, TCO and other financial tracking, as well as PM report manipulation templates using the pivot table function and macro formulas.
- o PM Teach-out Seminars # The financial tracking templates I created increased the efficiency of project resources drastically, and was voted as one of the presentation topics for the weekly PM Teach-Out Seminar to introduce these new tools to senior management team

o Ability to work across multiple projects under large client programs and consolidate various project data sources to increase the efficiencies and reduce the project timelines for the entire program

Business Analyst

2004 - 2005 (1 year)

- Assisted HR Business Partners in streamlining HR and Payroll-related functions and minimizing the redundancy in middle-level reporting
- Created re-usable training documents and conducted executive trainings and presentations for 15+ senior executives and 40+ senior managers for the new SAP Cross-Application Time Sheet (CATS) implementation.
- Additional "Train-the-Trainer" sessions were conducted with in-depth technical details, including training the technical analysts, department admins, HRBP's, as well as the Change Champions.
- Conducted performance feedback from all training classes on the quality of the training materials and training sessions. One-on-one sessions were scheduled as needed based on the results of the performance evaluation.

- Analyzed and implemented the Corporate Financial System for Montreal and Toronto offices and increased the coordination between Finance, Accounting, HR, and IT corporate departments
